### Green Lights Recycling Announces Expanded Service Offering

Blaine, MN

Green Lights Recycling, Inc (GLR) today announced that it will begin accepting mattresses and box springs for recycling from residential customers and households. The expanded service offering will coincide with our annual Earth Day Celebration on April 22, 2011. Residents can deliver old unwanted mattresses to GLR during regular business hours, Monday through Friday between 7:30 am to 4:00 pm. A modest fee is required for this service.

John Crudo, President of GLR commented that "there is a great deal of excitement within GLR anytime we expand our service offerings to help customers and make it very convenient for them. Our goal is to help keep as many items such as mattresses and box springs from entering landfills which will save approximately 23 cubic feet of landfill space per mattress". GLR has teamed up with PPL Industries from Minneapolis to process the old mattresses. John Crudo went on to say "This helps our generation and generations to come by having a cleaner environment to live in. The mattresses and box springs will be recycled by adults with social and economic barriers. This is our chance to help others and our environment at the same time".

Green Lights Recycling is conveniently located in Anoka County, Minnesota. The company also recycles computers and electronics equipment, fluorescent lamps, appliances and batteries along with a host of special waste items. A more complete list items we recycle is available on our web site.

We invite anyone who is interested in knowing more about the company to contact us directly. Call, click or visit Green Lights Recycling today.
